AUTOMATION ANYWHERE®
Go be great.

Fast Track course on

Robotic Process Automation

using Automation Anywhere

📅 October 5, 2019   📍 AAA, 2019 IMPACT THE FUTURE, NYC

Thank you for attending our session. You've taken the first step in adding cutting edge automation knowledge to your ever-growing skillet.

What's Next?

The first step for this is optional, but very helpful. Register at Automation Anywhere University and take time to complete some preliminary eLearning courses. We recommend you complete at least following this course prior to the Mastering Bots session:

- Hello Bot: Introduction to RPA
- Build the Digital Workforce – Create bots using Enterprise 11
- (optional) Lead the Digital Workforce – Monitor, Measure & Manage Bot performance (V11.0)

To participate in the Training, you MUST install the Free Community Edition of Automation Anywhere to your laptop. Here are the steps:

- Register at: https://www.automationanywhere.com/lp/community-edition
- Complete the steps outlined in the email sent to your registered account
  - Login to the Community Edition Control Room
  - Download and install the Client software
  - Record your credentials for logging into the Client
  - Engage with the various resource available to Community Edition users including:
    - Community Edition Resource Center
    - Register for the A-People Community

Your laptop should be using Microsoft Windows version 7 or greater, Windows 10 is a great option. We use Internet Explorer browser for most automations, Google Chrome is also supported. Your laptop should have 8 GB of RAM for best performance. You should also Microsoft Office installed (Microsoft Excel is required for the Mastering Bots course).
